The wireframe depicts a web application for a marketplace. At the top, a browser-like header shows navigation icons and a URL bar. The main header features a logo and the word "Marketplace", along with user information fields for "Firm x" and "User Name".

A left sidebar contains four menu items: "Profile", "Listings" (highlighted in blue), "Listing Request", and "Global WhitelistManagement".

The main content area is titled "Installed and Requested Listings". Below the title are filter controls for "Status" and "Listing Type". A table with six columns follows: "Select", "Name", "Last Updated", "Type", "Updated", and "Access Status". The table contains four data rows, each with a checkbox, a listing name, and placeholder text for the other fields.

On the right side, a blue "Create Listing" button is shown, with an annotation pointing to it from a "Create Listing Page" box. Another annotation points from the "Create Listing" button to a "Button" label.
